Clear Search

Aparece un formulario de búsqueda que permite introducir en diversos campos (Title, abstract, Publication number, Application number, Applicant(s), Inventor(s)...etc.) aquellos términos que caractericen mejor su investigación (palabras clave técnicas, empresas, inventores, fechas de solicitud o publicación .....).

En la columna de la izquierda aparece una Quick help (ayuda rápida).

La elección de una adecuada estrategia de búsqueda facilita la localización de la información realmente relevante. Es importante que a la hora de seleccionar las palabras clave de nuestra búsqueda tengamos muy en cuenta las diferentes acepciones (sinónimos), que pueden ser utilizadas. Así, si estamos buscando maletas (cases, suitcases), también deberíamos buscar equipaje (luggage, baggage).

Siguiendo nuestro ejemplo, escriba:

SAMSONITE en el campo Applicant(s) (solicitante) y

CASE\* OR LUGGAGE\* en el campo Title (título)

Esta búsqueda recupera aquellos documentos de invenciones que cumplen dos condiciones; primero que incluyan en su título la palabra CASE y/o la palabra LUGGAGE (dos palabras en inglés que corresponden a MALETA y EQUIPAJE en español) y, segundo que hayan sido solicitadas por la empresa SAMSONITE.

El operador \* representa una cadena de caracteres de cualquier longitud. CASE\* y LUGGAGE\* recupera todas las palabras que comiencen por la raíz CASE o LUGGAGE, tales como: CASE, CASEs, LUGGAGE, LUGGAGEs.

El operador OR entre dos palabras, corresponde al operador O español y obliga a que cualquiera de ellas aparezca en el campo de búsqueda.

#### 4. INTRODUZCA LOS TÉRMINOS DE BÚSQUEDA Y PULSE EL BOTÓN AL FINAL DEL FORMULARIO.

**Abstract of US2015040622 (A1)**  
Translate this text into:   (powered by Google Translate)

An apparatus for selectively securing at least a first zipper closure mechanism (28), and a second zipper closure mechanism (136) of a luggage case (100), may include a lock device (148) coupled to the luggage case (100). The lock device (148) includes a lock mechanism (158) operable between a locked and unlocked configuration, at least two securing members (151, 152, 153, 154) for releasable receipt of at least a portion of each of the respective first and second zipper closure mechanisms (120, 136), and at least one release member (160) for actuating the lock mechanism (158).
